

How do I care for my Lash Lift? (Important 24 – 48 Hours)

Immediately after the procedure avoid hot steamy showers or saunas for 24hrs after treatment. Avoid getting your shampoo or conditioner on the lashes over the next 24 hours which would weaken the color (if tinted) and **relax** the “Lash Lift”. Also avoid creams around the eye area. Do not rub or play with the lashes, if any irritation occurs, apply a clean cold wet pad to the eye area. Discontinue the use of lash growth products (Revitalash, Latisse, etc) for 48 hours. Mascara can be applied after 24 hours, however, do not use strong or oil-based eye makeup removers for 48 hours as they may strip the color if tint has been performed. We also advise that because the lashes are still malleable (shape shifting) a side sleeper can notice one or both eyes can raise or drop leaving lashes misshaped, sleeping on the back is best.

Enjoy your Lashes!
